

# Setting Conditions for the Future

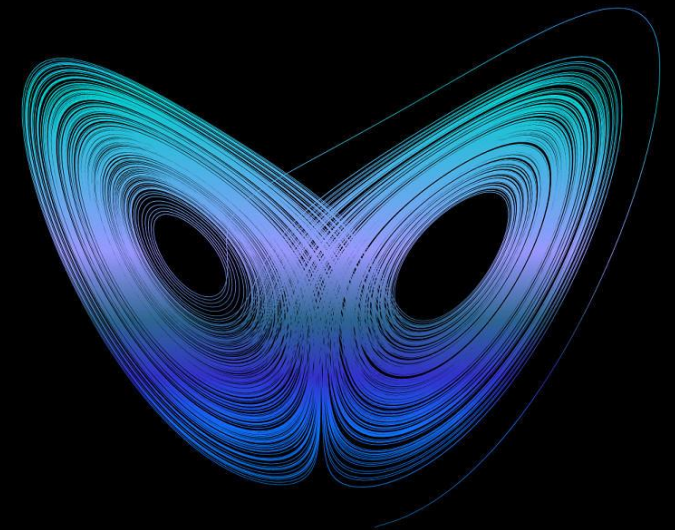

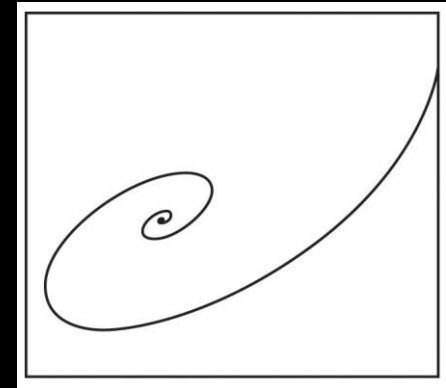

COMMUNITY COMMONS

JUNE 2023

# An emerging pattern . . .

The HSD community will be quite different in its next phase of growth and development.

- Until now, it has been a **point attractor pattern**, with Glenda, Royce, and the HSD Institute in the center
- In future, it will be a **strange attractor pattern** setting conditions for a system-wide pattern and unlimited individual freedom
- The global strange attractor pattern is emerging.

# Setting Conditions . . .

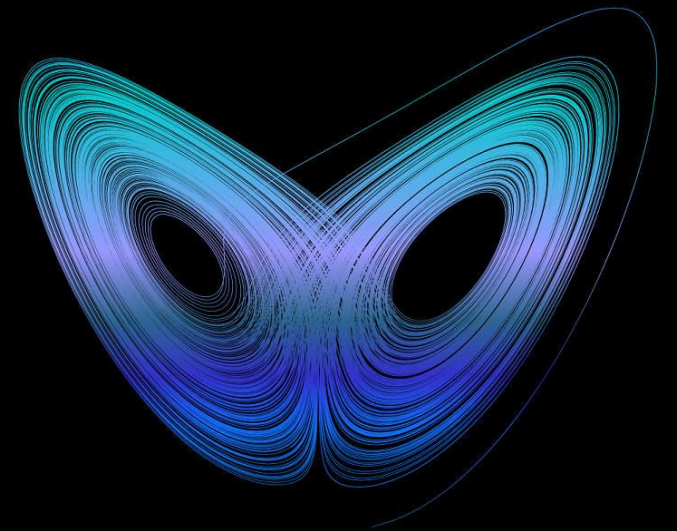

The Institute will evolve with the community to provide the minimum constraints and maximum freedom

We have heard that the following functions will be required:

- Decision making
- Communications
- Convening
- Coherent theory
- Resources

The strange attractor pattern will be informed by:

- HSD Vision
- HSD Simple Rules
- Core Models and Methods: Adaptive Action, Inquiry, Pattern Logic

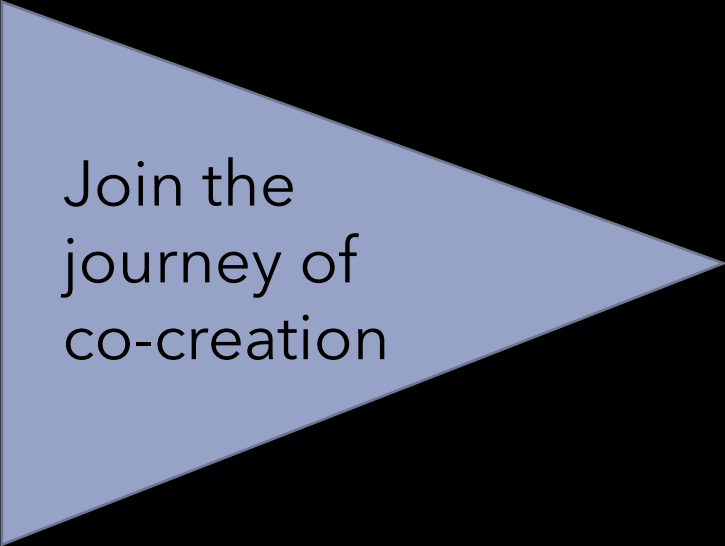

# NOW WHAT?

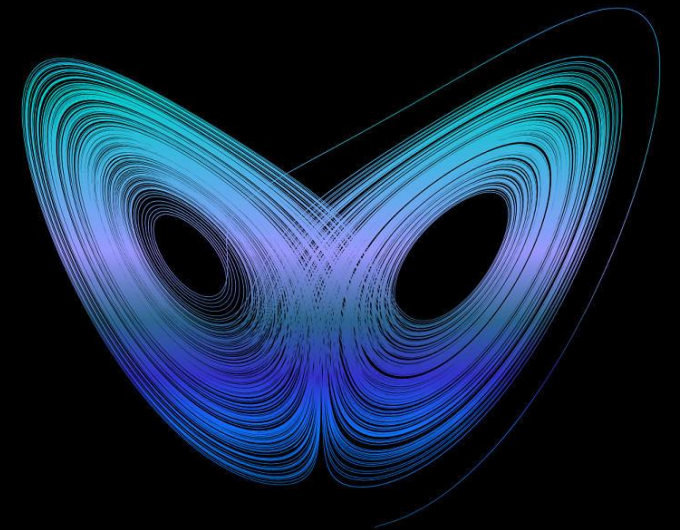

You are invited to co-create the conditions for the future.

We will meet xxx with anyone who is interested in co-creating the future with us.

We will be in communication with everyone as patterns and questions emerge.

Join the  
journey of  
co-creation

# SO WHAT patterns do we want?

## Point Attractor Pattern

Single Goal  
Maximum specifications  
Striving toward homogeneity  
Productive  
Predictable  
Planned  
Power and privilege  
Pulled toward a center  
Predict local and global  
And ...

## Strange Attractor Pattern

Multiple goals  
Simple Rules  
Infinite variety—within boundary  
Generative  
Surprising  
Emergent  
Shifting influence  
Bounded with infinite possibility  
Predict global but not local  
And ...
